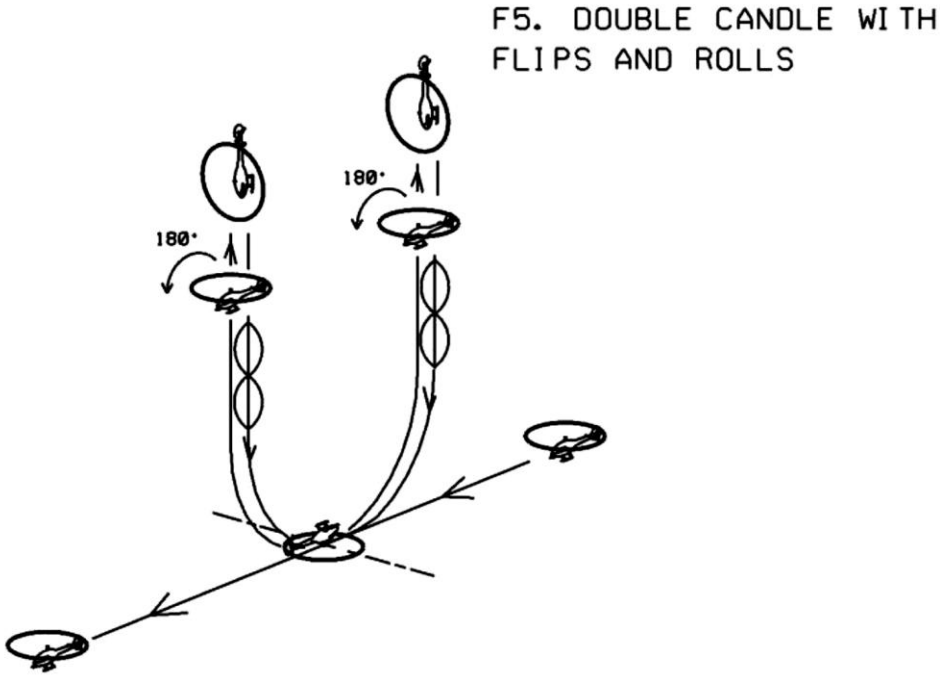
Program "F"
2026/2027
Presentation of the Figure: F5
Double Candle With Flips and Tolls (UU)

Presentation Created by Roger Lacôme and Eladi Lozano



F5: Double Candle with Flips and Rolls (UU) **K=1.0**

MA flies straight and level for 10 m minimum and performs a pulled 1/4 loop at the centerline, flies vertically upwards and performs a 180° travelling pushed flip and climbs backwards a little further until MA comes to a standstill.

MA flies vertically downwards and performs a full roll in any direction followed by a half centered outside loop, flies vertically upwards and performs a 180° travelling pushed flip and climbs backwards a little further until MA comes to a standstill.

MA flies vertically downwards performs a full roll in any direction followed by a quarter loop and flies horizontally straight ahead from the centerline at least 10 meters.

Note 1: Entry and exit must be flown at the same height.

Note 2: The flips must be flown at the same height.

Note 3: The vertical straight sections before and after the flips must be of the same length.
